

Registration

What is the Process for Provider
Registration?

Claudia M. Castaneda
ECHO Operations Workshop
June 6-8, Greenbelt Maryland

Provider Application

- Electronic application form with the following information:
 - Provider contact information
 - If not using BMGT DTD, then:
 - ❖ Indicate Date format
 - ❖ Indicate DTDs used by the XML files
 - Identify Product Specific Attributes (PSAs).

Provider Application

- Coordinate system used:

- ❖ Cartesian
- ❖ Geodetic (WGS '84)

- Type of participation:

- ❖ Order data provider
- ❖ Non-order data provider

Approval Process

A committee decides whether the provider is approved or not.

- Potential Outcomes?
 - a) Approval: Once approved, the registration process continues.
 - b) Not Approved: We will work with the provider to solve differences so that approval may be established.

Establishing a Data Provider

Step 1:

An e-mail is sent to the contact for the provider with a temporary id number.

Step 2:

A new provider identification is agreed between the Data Provider and the ECHO System Operations.

Step 3:

Set up UNIX system accounts and directories

Establishing a Data Provider

Step 4:

Set up database accounts

Step 5:

Install functions specific to each data provider

Step 6:

Test ingest and order processing

Step 7:

Establish automatic ingest of metadata from
data provider
